PROJECTS

Online Timetable Management System
- MongoDB: Use MongoDB as the primary language web development.
- Time Table API: Connect with a Time Table data provider using an API key.
- Frontend: Develop frontend using HTML, CSS, and JavaScript, with an optional frontend framework like React or Vue.

Reduce food wastage and improve food security
- Reducing food waste is not just important—it's our responsibility. Globally, about one-third of the food we produce gets lost or wasted. This not only harms the environment but also makes the issue of food insecurity worse
